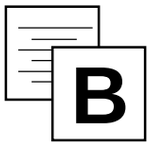
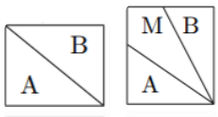
Features

AA		BB	CC
AA AA		DD	EE
FF	GG	HH	II
JJ	KK	LL	MM

Merge and split cells



Text alignment and basic text styling



Slashboxes and cells with two diagonals separators

Question	Answer
1	5.75
2	10.5

Align cells with a character like a period or a comma

	Rock	Paper	Scissors
Usage	6	3	4
	3	1	7
	2	5	6

Rotated cells

Greek Letters	
α	β

Set background color for odd-even rows or for each cell

Heads	Tails
2	6
4	3

Multiple border types (normal, double, booktabs and dashed)

1		
2	1	
3	3	1

Set borders' width

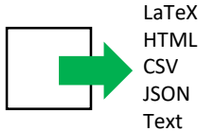
a	b
c	d

Improved double borders via hhline package

Margins	No margins
Text text	text text

Set cell's margins

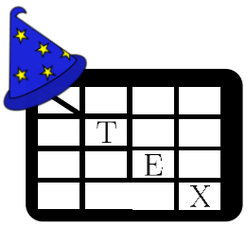
Import from CSV, JSON and plain text (with a tool to split columns and rows)



Export to LaTeX, HTML, CSV, JSON and text

And more…

(including long tables, rotated tables, captions, labels, floating position…)

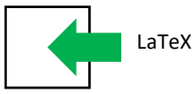


Goals

1500 CA$

Thank you ! The LaTeX Table Generator will be released under four months !

2500 CA$

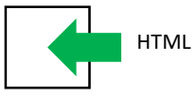


Import tables from LaTeX

2800 CA$

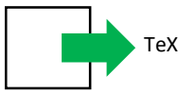
Easytable package support

3700 CA$



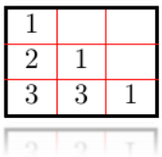
Import tables from HTML

4200 CA$



Export tables to plain TeX (basic support)

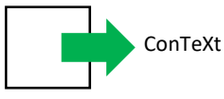
5000 CA$



Set cell border's color

Switch from WYSIWYG editor to LaTeX source code editor for each cell

7000 CA$



Export tables to ConTeXt (basic support)

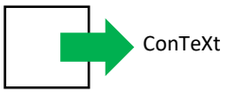
8000 CA$

Spreadtab package support
(Calculation inside cells, like Excel)

9000 CA$

Import tables from ConTeXt (basic support)

15 000 CA$



Export tables to ConTeXt (Most features)
